MINING NEWS

EL TEMPLOR IS RESUME WORK

Mine Near El Tigre Is
Leased by W. L.
Rynerson.

Douglas, Ariz., June 12.—The El Templor mine, 11 miles to the south of El Tigre, has been leased to W. L. Rynerson. Work on the property will begin about July 1. The Templor was originally located by James Taylor, who, after working it for a short time, sold the property to J. J. Steindler, paying a bonus of \$50,000 cash. At that time the exposed ore ran up into five figures for the ton. Since that time the property has remained idle, proving a bonanza to the many highlanders in the district, who were acquainted with the values contained in the ore. About the only work done on the property has been in driving tunnels and sinking on the main ledge, without stopping, which leaves a large amount of high grade ore that can be mined immediately.

Some of the last assays from samples taken by Mr. Rynerson show as high as 8000 ounces silver and 85 ounces gold to the ton, over a considerable width. While the ore shoot now exposed is not more than 200 feet, carrying high values, yet Mr. Rynerson expects to continue the main drive to further expose the ore.

A. R. Dickson, of the Washington Mines Development company, has returned from Los Angeles, where he was successful in securing a lease on the Agua Buena mine. The Agua Buena, located about nine miles south and east of Nacozari, is owned by the Silver Seal Exploration company. The property has been worked by C. B. Bell and associates for the past year, from which has been shipped 12 cars of high grade ore.

According to Mr. Dickson, work on his lease will begin in the next few days, continuing for one year on a 15 percent royalty basis.

NEW MINE COMPANY ELECTS OFFICERS

Las Cruces and El Paso Men
Interested in Organ
Mountain Property.

Las Cruces, N. M., June 12.—The first meeting of the Organ Mountain Mining company was held at the office of the company in Las Cruces and officers and directors were elected for the coming year. For president, D. F. Vest, of Philadelphia, Pa. vice president, Robert R. May, Las Cruces; treasurer, C. H. Gill, Las Cruces; N. M. secretary, J. McCollough, El Paso, Texas. These officers, with F. M. Hayner, Las Cruces; S. C. Aubrey, El Paso, and S. Lehman, Newton, Kas., form the board of directors.

This company has taken over the mining property in the Organ mountain known as the Stephenson-Bennett and expects to commence active operation on the development of the lower levels of the mine within the next 60 days. This mining property is one of the best known properties in the southwest. The Stephenson mine was patented in 1872 and has the distinction of being the second patent issued on a mining property in what was then known as New Mexico, embracing the present state as well.

El Paso and Las Cruces Men.

The mine was first opened in 1849 and several tunnels have been mined from above the water level in the oxidized zone. When the mine became developed to a point where the water drove the early operators out, the Stephenson-Bennett properties were consolidated and the work of developing the lower levels commenced. The present company is organized for the purpose of completing the work that was started by its predecessor, the Stephenson-Bennett Mining company, and to this end many of the leading business men of Las Cruces and El Paso have become actively interested in the proposition and have places on the board of directors in order to assist in the management of this well known group.

Work at the mine will be under the direct supervision of J. L. McCollough, who has made mining a study for many years. He will be assisted by A. L. Hurley, who will be operating manager and have personal charge of the work at the mine. Mr. Hurley comes from Park City, Utah, where he was for many years associated with the Silver King Mining company.

TO BORE FOR OIL IN ARTESIA FIELD

Pecos Valley Oil and Gas
Company Incorporates
For \$100,000.

Artesia, N. M., June 12.—The Pecos Valley Oil and Gas company has incorporated for \$100,000 under the laws of Arizona, one-half of which has been paid in. Its principal office is in New Mexico. The company is authorized to build refineries as well as to extract oil and gas. Two car loads of 15, 18 and six inch pipe have arrived for the company. The president of the company, John C. Collins, is here and will decide upon the location of the first test well. The company has leases on several farms south of town and is prepared to sink 3100 feet for oil, if necessary.

MANY LESSORS IN TOMBSTONE DISTRICT

Tombstone, Ariz., June 12.—The usual number of lessors are working on the properties of the Tombstone Consolidated properties and with good results. Shipments are holding up as in the past. The cyanide plant of Macia and Ralph, at the west side, is bringing satisfactory results. George Key, on his lease, is doing exceedingly well. It is problematical when the bankruptcy proceedings of the Consolidated will be closed, but matters are going along most satisfactorily under the management of trustee A. L. Grove, and the property is self-maintaining. It is very likely nothing will be done toward discharging the bankrupt for some few months.

MAY BUILD TRAMWAY FOR HAMBURG ORES.

Hamburg, Ariz., June 12.—President Henry Hamburg, of the Hartford Mining company, has a good force of men at work on that property and the company has an excellent body of good silver ore as well as copper ore developed. It is thought that the building of the southwestern branch from Lewis Springs to Ft. Huachuca will result in a spur being run to the mouth of Ramsey canyon, and that the Hamburg ore will be brought out by an aerial tramway and loaded directly upon the cars.

In the event this is done it is said that the Butte-Arizona property, which is known to be a large body of good silver-copper ore, will be revived and the people in Ramsey canyon look for big revival of the mining business in that field.

MINING NEWS

ALL RECORDS AT RAY ARE BROKEN

During May 126,000 Tons of
Ore Were Delivered;
New Concentrator.

Ray, Ariz., June 12.—During the month of May the mining division of the Ray Consolidated Copper company surpassed all previous records in output and men employed and aggregated a higher sum for new equipment than in any month since the main work at shaft No. 2 was finished. This gradual increase will continue until the production of ore has reached an approximate tonnage of 8,000 tons per day.

In May 2,100 cars of crushed ore were shipped to Hayden, making the month's deliveries 126,000 tons. While this is but a perceptible increase over April's output, the development, blocking out and breaking underground is far beyond that of the previous month, and conditions for June are such that a higher tonnage is looked for. The payroll totaled \$145,000.

The foundation for a new compressor has been finished and the building is well under way; excavating for the hoisting and crushing pulps at mine No. 2 is forwarding rapidly and the foundations will be partly done in July; the big electric pump that has been recently placed in the Humboldt shaft, has drained the water entirely from the central section of mine No. 2; a gang of electricians is rushing work on the signal system at No. 2 shaft, and another squad is stringing wires for the new trolley line to the Ray Central. A new hospital is to be erected here. It will be a structure of ample size to meet the increased requirements, and the one at Kiviv will probably be abandoned.

A precipitating plant, consisting of 600 feet of launders, is being erected in Copper canyon at the southern extremity of No. 2 mine. If the results of this are satisfactory, another one will be placed in the vicinity of the entrance to the same mine.

Thirty men were set to work yesterday to cut away the point that projects from the Ray Central and prevents the extension of a necessary railroad spur to the property. All the houses owned by the Ray Central company are to be moved to the American townsite. Superintendent Gates has gone to Boston on a combined trip of business and pleasure, and W. S. Boyd is acting in his stead.

W. H. Pickles, who has been in the mechanical department of the R. C. C. Co. for some time, has resigned to go back to his old position in Mexico, where he will be joined by several others who have been driven out by the chaotic conditions.

R. C. Rowland, for the past three years chief engineer for the Ray Consolidated, will shortly resign to become affiliated with the Guggenheim interests at Salt Lake City. Rowland is regarded as an expert in drilling and explorative tests, and his new duties will be confined to that phase of work entirely.

It is not your fault—it is your liver. No one can be in good spirits when their system is not carrying off the waste products.

COUPON

Save it for a copy of

The American Government

By FREDERIC J. HASKIN

The Book That Shows Uncle Sam at Work

JUNE 19

How to Get This Book

Cut out the above coupon from six consecutive issues of The Herald and present them, with 50 cents to cover the bare cost of manufacture, freight and handling, and a copy will be presented to you without additional cost. A \$2.00 VALUE FOR 50c. Act quickly if you want a copy.

Save six consecutive coupons and present them at The Herald office.

EACH BOOK BY MAIL 15 CENTS.
EXTRA FOR POSTAGE.

MINING NEWS ALL THE MINES AT GLEASON ARE ACTIVE

Burned Portion of the Camp
Is Being Rapidly
Rebuilt.

Gleason, Ariz., June 12.—Every one of the properties in this camp are working now and the stiff price of copper bids fair to cause a larger addition of the working forces of all the properties.

The Shannon, McKittick and Warnock properties are either shipping or getting ready to increase their shipments. The recent fire which destroyed the business section of the camp will soon be restored and to all appearances with a much better lot of business houses than before the fire.

BUSINESS PICKING UP IN THE COVERTLAND DISTRICT

Courtland, Ariz., June 12.—Business is picking up wonderfully in this camp and every one has the most optimistic feeling. The Young-Warnock properties are shipping about 20 cars of copper ore monthly and the Leadville lease is showing up fine, and as for the Homes property, there is every reason to believe that it will be working full blast before long.

MINING NEWS

CHURN DRILLING IN PEARCE FIELD

Commonwealth Will Put
Down 15 Holes For
1000 Feet.

Pearce, Ariz., June 12.—The churn drill of the Commonwealth Mining and Milling company is now down 200 feet and the results even at this shallow depth have been satisfactory to the company. It is very likely that the company will put down about 15 holes, each to a depth of 1000 feet. Adjoining the Commonwealth property is the property of the Commonwealth Extension, and on this property a shaft has been put down to a depth of 200 feet and the company has a showing of 100 feet of good milling ore in this shaft. Work on this shaft has been stopped until a steam hoist is installed so that work can be done more economically. Work will be started on a shaft that is now down 60 feet at a point paralleling the work being done by the old Commonwealth's churn drill and when this shaft is down to the same level as the 200 foot shaft a crosscut will be run connecting up the two shafts, thereby proving up the hill for a distance of about 600 feet. Pearce people

are looking forward to big results from both the old Commonwealth and the Extension companies.

ERNESTINE KEEPS UP GOOD RECORD

Shipment From Pacific Is
Increased; Good Ore
Struck in Mine.

Mogollon, N. M., June 12.—The Ernestine Mining company is continuing its high production. The last ten day cleanup for June yielded 500 pounds of bullion and 12,000 pounds of high grade concentrates. If this record is continued it will exceed that of the Socorro mines.

The Pacific shipment will be increased this month, as it has opened a new ore body in the tunnel. An average sample 10 feet across the face assayed \$14. The ore body has 80 feet of back which the company has already started stopping. The south shaft has good ore in the north drift of the 200 foot level. Some high grade tetrahedrite was struck along the hanging wall which assayed \$150. It is highly oxidized and looks like malachite.

The Deep Down is still shipping daily to the Deadwood mill. The ore breaking has been let on contract.

"BACK EAST" LOWFARE EXCURSIONS

Hundreds of delightful places to spend a summer vacation. Including fascinating New York and historic old Boston. The Sea Shore and the picturesque New England mountain resorts. All "back east" excursions at greatly reduced fares. See that your tickets, which are on sale at your home ticket office during the summer, read via
